

# Do you need to send a communication to our customers?

Sapient Razorfish can help

SAPIENT  
RAZORFISH

# Hello

We're Sapient Razorfish, contractors to Capital One and we create a whole range of communications for your business. Most of the time we work with Brand to develop marketing communications, but we're available to work with any team within the business to develop operational or servicing communications too.

So we can work with you.

If you've never worked with Sapient or any other design agency before, this will explain everything for you.

In this step-by-step guide you'll find out how to:

- Write a brief to get the work that you want done
- Work with Sapient throughout the process
- Make sure that your work is in keeping with Brand Guidelines, is compliant with your internal and external communication requirements, and is approved by Brand and Legal

You'll find Sapient on the second floor close to the Wollaton Park kitchen.

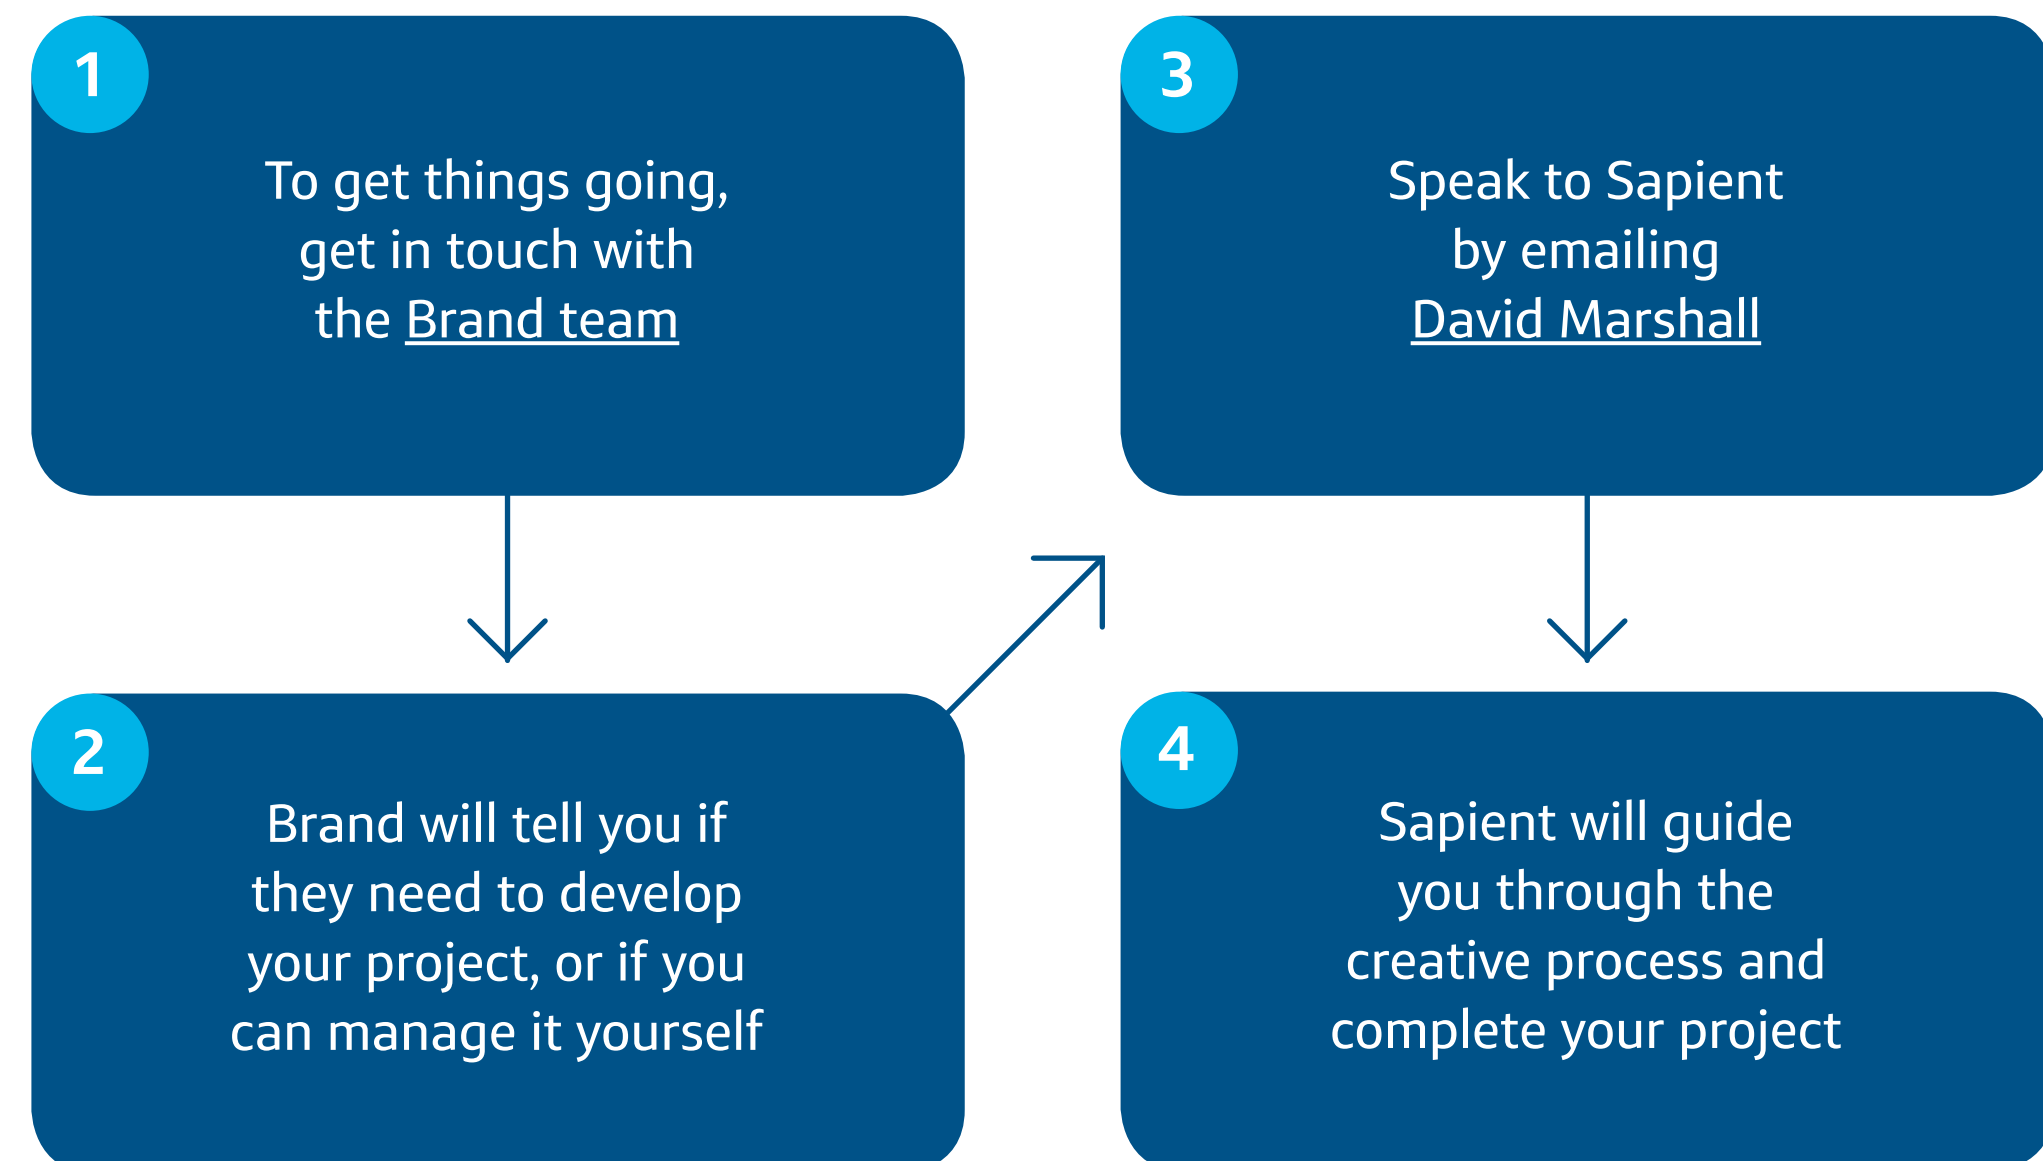

The person to speak to is David Marshall.  
You can email him at [dmarshall@sapient.com](mailto:dmarshall@sapient.com).

## What kind of work is covered?

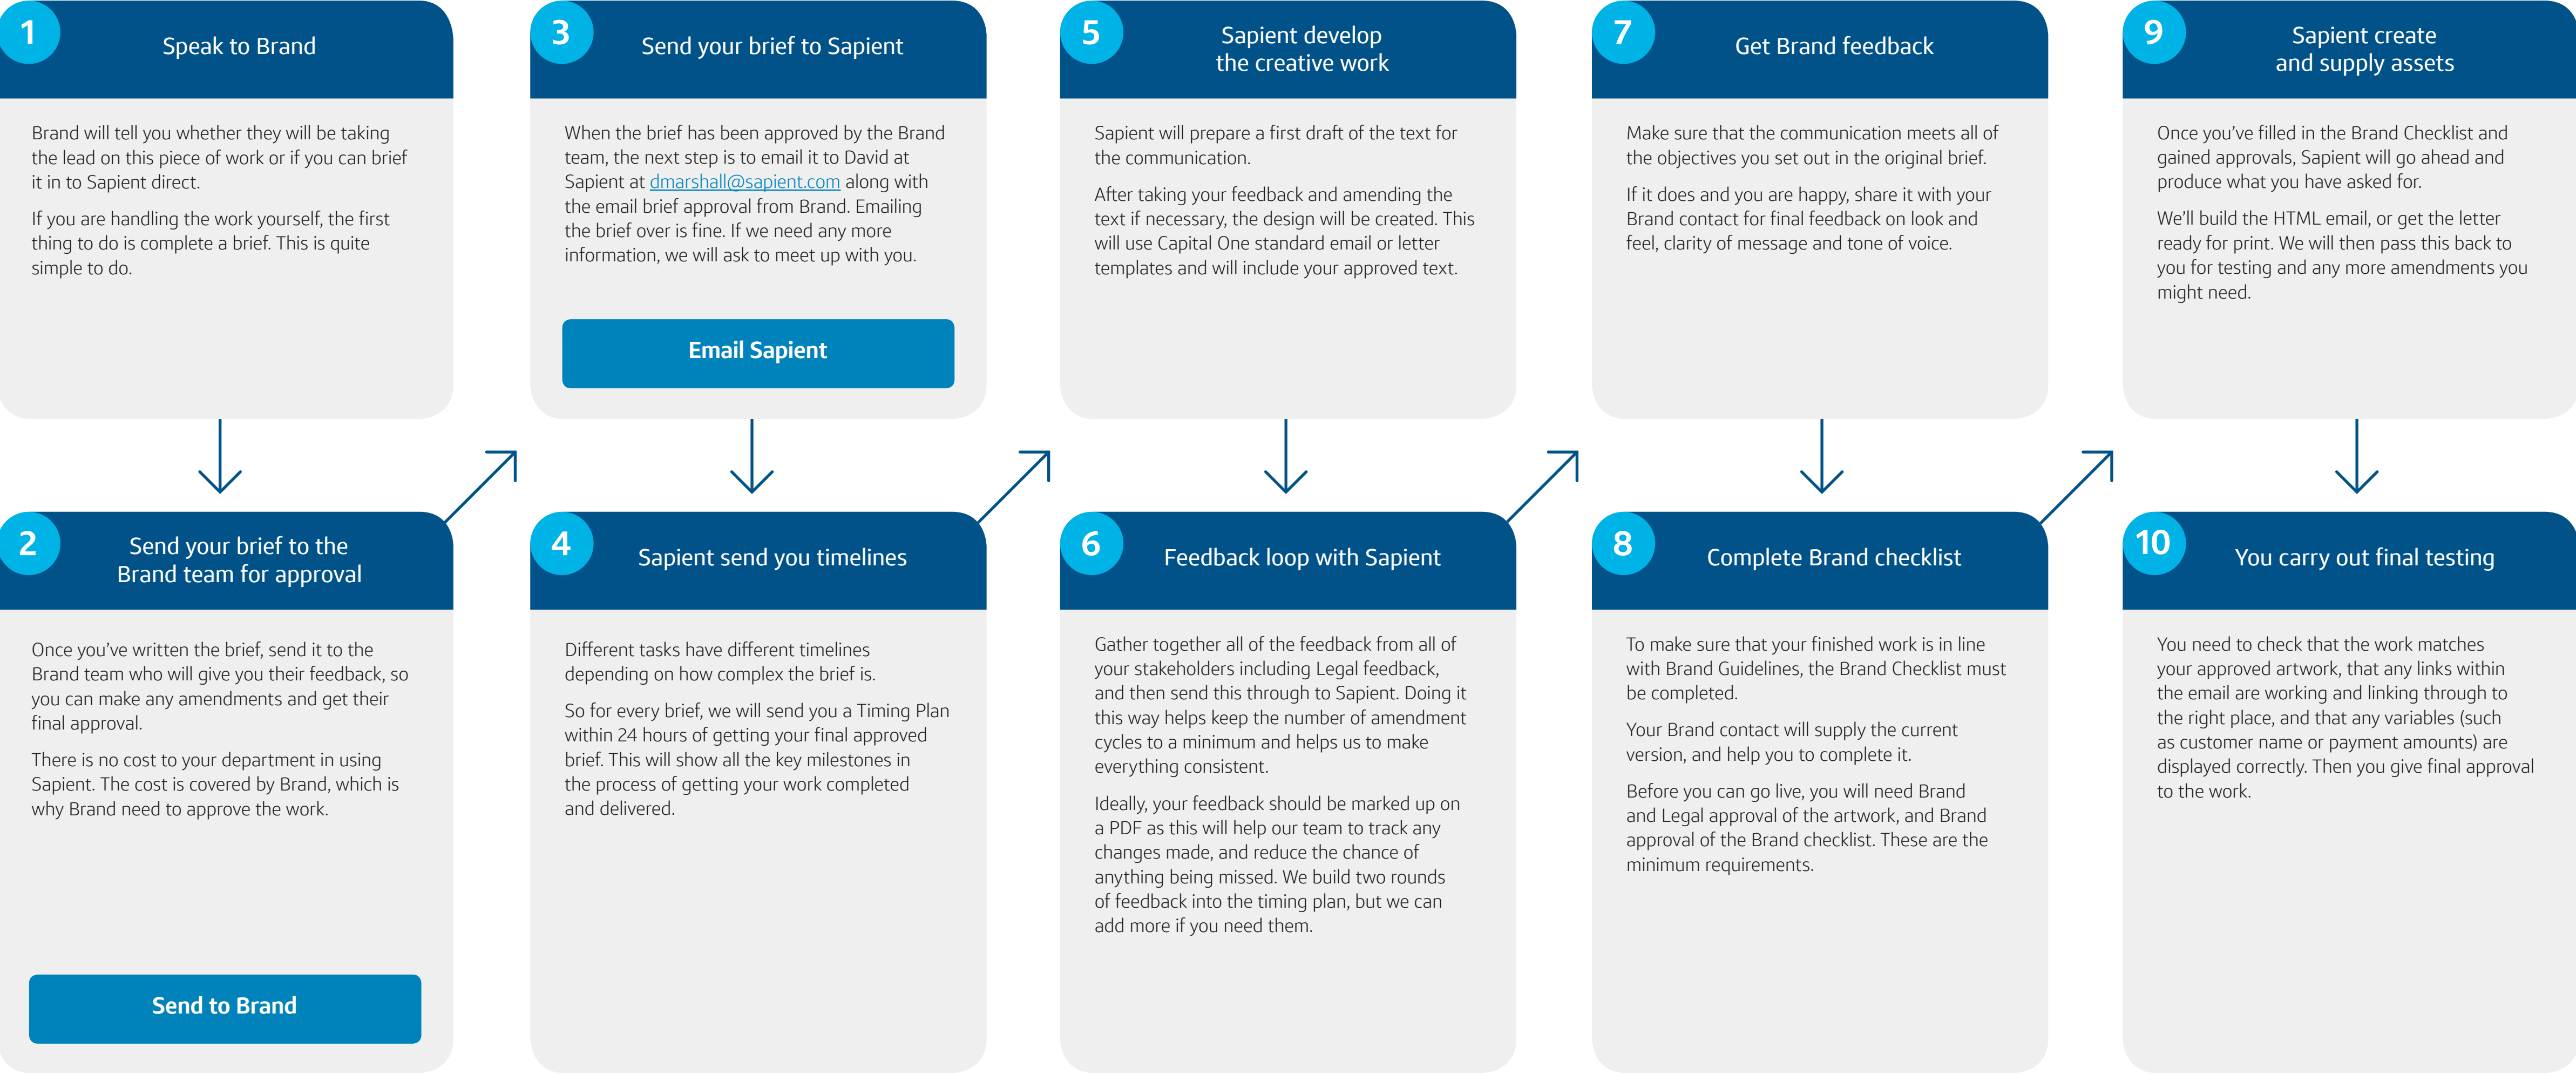

The usual work we do with the Brand team, for customers, is designed to get them to take action, build loyalty or promote our brand.

If you need to develop a new communication which is simply providing information to a customer, or make tweaks to something which already exists, you can brief these direct to Sapient after Brand have approved your brief. These changes could include anything from amending a telephone number, to alterations or revisions to terms and conditions. By communications we mean emails, letters and inserts/leaflets.

## A quick overview

# Here's how to do it

If you have any more questions, please email James in the Brand team at [James.Russell@capitalone.com](mailto:James.Russell@capitalone.com).  
Or email David at Sapien at [dmarshall@sapien.com](mailto:dmarshall@sapien.com).

- 1 Tell us if it's a letter or an email or both, and how many versions of it you need.
- 2 Tell us who you are communicating with and anything we should know about that audience.
- 3 Tell us how the communication is going to be delivered - Campaign Delivery/Tag, CCM.
- 4 Tell us how you want to track the communication.
- 5 This is where you attach all the relevant files and assets that Sapient will require to begin work.

4

Tell us when you want the work completing and any Work In Progress meetings you would like to have.

6

To get things going, get in touch with James in the Brand team. You can email him at [James.Russell@capitalone.com](mailto:James.Russell@capitalone.com).

# Marking up a pdf

Just open Adobe Reader and use these two simple features: the comment tool and the highlight tool.

## Comment tool

Click to add a general comment. Double click the icon to edit the comment. Right click the comment icon for more options.

Thanks for being a Capital One customer.

## Save and send

Then save the file and send it back to Sapient to make the changes.

# Useful terms it's good to know

A

**Asset:** documents Sapient will find useful when briefing. These can include past creative work, audience insights and so on

B

**Brand checklist:** James  update what this is

**BMP (or .BMP):** short for Bitmap, this is a commonly used graphic format for saving image files on both Apple Macs and PCs

**Brief:** document detailing exactly what you need and when you need it

C

**Communications:** emails, letters, inserts/leaflets

E

**Email/letter templates:** Capital One approved customer templates

G

**GIF (Graphics Interchange Format or .gif):** a type of computer image that moves as an animation, because it consists of frames like a movie with  sound

H

**HTML email:** Hypertext Markup Language is the standard language for creating emails and web pages

I

**Insert or flyer:** a promotional piece which is inserted into one of our mailings along with the letter

J

**JPEG (Joint Photographic Experts Group or .jpg):** a common image file format that is very effective at displaying high colour images in a compact file size. Photographs to be used on the internet are often compressed as .jpgs.

P

**PDF (Portable Document Format or .PDF):** an open file format used to create or view documents. PDF files can be used to review and approve ads. In some cases, they also can be used as the final file format which is sent to the printer

**PNG (Portable Network Graphics or .png):** a type of image often used on the internet as an alternative to a JPEG, but it cannot be animated

T

**Testing:** checking that the final letter or email is correct and any links are working correctly 

**TIF or TIFF (Tagged Image File Format or .tif):** an image format file for high quality graphics

V

**Variables:** alternative text driven from a data file which allows one email to cover off multiple variants
